

What do multi-functional lockers look like

Overview

What are the different types of lockers?

Whether you are looking for lockers for your workplace, gym, hospital, or school, you need to consider the design, functionality, and durability of your options. In this comprehensive guide, we will introduce you to the different types of modern lockers, such as melamine lockers, laminate lockers, wood lockers, and more.

Why should you choose modern lockers?

Come talk to one of our smart locker experts to get you started on your customized solution. Modern Lockers offers secure personal storage that is more than just a locker. Lockers are now reimagined with our custom and unique designs.

What makes a smart locker reimagined?

Fully reimagined. By taking the basic fundamentals of a locker, secure personal storage, and elevating them with design, smart tech, and UX in mind – we can create a beautiful, functional locker that will bring joy to the user and insights into how your smart building is being used. Don't overlook employee personal storage.

What is a laminate locker?

Laminate lockers are constructed using a type of composite material known as high-pressure laminate (HPL). This material is made by layering paper or fabric that has been soaked in resin and then bonding them together through a process of intense heat and pressure.

What are phenolic plastic lockers?

Phenolic plastic lockers are made from high-pressure laminate (HPL), a composite material consisting of multiple layers of paper or fabric impregnated with resin and bonded together under high heat and pressure.

They are highly durable and resistant to scratches, dents, corrosion, and graffiti.

What is a melamine locker?

Melamine lockers are known for their durability, ease of cleaning, and resistance to scratches, stains, and moisture. They are available in a variety of colors and finishes, making it possible to personalize them to match your desired style and theme.
