

## Overview

---

How do I choose a solar panel?

When choosing a solar panel, it's important to consider what it's made of and the quality of its build. Frame: Encases and supports the solar panel structure; aluminium offers the best durability and rigidity. Glass cover: Tempered glass protects solar cells while allowing daylight to pass through.

What makes a solar panel a good choice?

Frame: Encases and supports the solar panel structure; aluminium offers the best durability and rigidity. Glass cover: Tempered glass protects solar cells while allowing daylight to pass through. Polymer sheet: Adds another layer of protection. Cells: Made from silicon, these convert sunlight into electricity.

Are solar panels still a viable option?

In the same breath, with solar panels in the mainstream limelight, most negative perspectives have encouraged industry action to make changes and adaptations, so that solar panels remain a brilliant (and financially viable) option for homes everywhere.

How do solar panels work in the UK?

Dependent on sunlight: Solar panels can generate electricity without direct sunlight; however, they are more efficient during peak sun time in the day. Specific solar panel placement: The best roof direction for solar panels in the UK is southwards with a 5° to 7° westward tilt.

Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.

Are solar panels effective in the UK?

Year-round efficiency: Solar panels can be efficient year-round in the UK, despite the country's reputation for cloudy weather. Advancements in solar panel technology have made them increasingly effective, even during the winter months. Low maintenance: After installation, solar panels demand little maintenance.
