Are rooftop solar panels right for You?

Rooftop solar panels aren't the perfect fit for everyone, but that's okay. Like any other home electrification product, solar panels provide clear benefits to homeowners needing energy upgrades and electricity bill reduction. The pros of solar outweigh the cons in most situations.

Are solar panels a good investment?

A greener home is without doubt more attractive in more ways than one. According to research conducted by FirstPort in 2023, potential buyers are willing to pay an average of £2,038 more for a home with solar panels installed. What's more, the more time you spend in your home with solar panels before moving, the bigger the uplift in house value.

Do solar panels save money?

Multiple solar panels connected together to form a solar array, also known as a PV system. Solar installers usually mount the solar array on your roof, but are also available. Homeowners do save money and help the environment when they use the sun's energy to power their homes. These aren't the only benefits of solar, though.

Are solar panels a pollutant?

But, although solar is definitely one of the cleaner options out there, it is still a pollutant to some extent. This starts with the production process when greenhouse gasses are emitted while manufacturing solar panels.

What are grid-tied solar panels?

Grid-tied: Having grid-tied solar panels means your home is still on your region's electrical grid. The solar panels collect the sun's energy, convert it to electricity, and send any excess energy back to the grid. The electric company can credit your account when you add solar energy to the grid through net

metering.

Are Wickes solar panels a good investment?

The long-term benefit of this investment, however, is the £850 a year saving in energy bills which means the panels will pay for themselves in 10 years. With Wickes Solar powered by Solar Fast, you can also split the initial cost using finance, making it a more financially practical option.
