

# What is yellow on photovoltaic panels

## Overview

---

Yellowing of PV modules refers to the optical degradation of ethyl vinyl acetate (EVA), a material used as an encapsulant on the panel, causing the once-clear encapsulant to become visibly yellow. What are yellow solar panels?

These cookies measure the conversion rate of ads presented to the user.  
Yellow solar panels: do they perform poorly, or just look bad?

“Yellowing” of PV modules is defined as the optical degradation of the ethyl vinyl acetate (EVA) where the clear encapsulant becomes visibly yellow or even brown.

What causes yellowing of solar panels?

The formation of acetic acid is found to be the predominant factor causing yellow discoloration [2,3]. Studies have been conducted by Fraunhofer and other R&D labs on solar modules with EVA encapsulant which have shown yellowing.

Can a yellow solar panel cause power loss?

The acetic acid released during the chemical reaction that lead to yellowing may cause corrosion in the solar panel, but is argued to be an unlikely mechanism for power loss in a yellow solar panel.

What color are solar panels?

The most common color for solar panels is black, as black surfaces are excellent at absorbing a wide range of wavelengths from the visible light spectrum. This is why the majority of solar panels on the market have a dark, black appearance. There are two main types of solar panel technologies that contribute to this black color:.

What does solar panel discoloration look like?

Solar panel discoloration is very noticeable, with the formerly white portions across the surface of the cell turning into a yellow or brown color, and it tends to happen just a few years after installation.

What causes solar panel discoloration?

For example, certain chemicals used to treat the glass panels react with chemicals used in the silicon cells, resulting in the formation of acetic acid, which is one of the leading causes of discoloration. However, there is an even more common cause of solar panel discoloration – exposure to sunlight.
