

What planet is in the western sky tonight

Overview

It's Venus! What can you see on a night sky map?

The map includes the Moon, stars brighter than magnitude 5, the five bright planets (Mercury, Venus, Mars, Jupiter, and Saturn), and deep-sky objects that can be seen without the use of optical aid. [How Do I Use the Interactive Sky Chart to Explore the Night Sky?](#)

Learn sky chart basics in our short tutorial:.

Which planets are currently visible?

See which planets are currently visible, along with their rise and set times, to help you plan your observations. Jupiter presents a captivating view with its prominent cloud bands, the iconic Great Red Spot, and up to four of its largest moons: Io, Europa, Ganymede, and Callisto.

When is Uranus visible?

Uranus is visible high in the southwestern sky preceding sunrise on October 22, 2024. It is visible to the right of Jupiter. It rises around a couple of hours after sunset. As Uranus shines at the edge of naked-eye visibility, it is hardly visible to the unaided eye unless you have clear eyesight and a very dark sky.

Is Venus visible after sunset 2024?

Venus is visible near the western horizon following sunset on October 22, 2024. It sets around an hour after sunset. It is easily visible to the unaided eye. It is the brightest object in the evening sky (except for the moon). Venus is easier to spot in the southern hemisphere than in the northern hemisphere for this evening apparition.

What is a night sky map?

Whether you're using just your eyes, binoculars, or a telescope, the night sky offers endless wonders waiting to be discovered. Happy stargazing! This

skymap is a dynamic visualization that displays the positions of celestial objects in the night sky for your specific location on the current date.

What is the brightest object in the morning sky?

It is the brightest object in the morning sky (except for the moon). On this day, Jupiter shines with a magnitude of -2.5 and is located in the zodiac constellation Taurus, the Bull. Uranus is visible high in the southwestern sky preceding sunrise on October 22, 2024.
