

# What to do if the solar panels are damaged

## Overview

---

Here are some steps to help you do that: First, assess the damage. If the panel is cracked or shattered, it will need to be replaced. Next, clean the damaged area. Remove any dirt, dust, or debris that may be preventing the panel from functioning properly. Then, apply a sealant to the damage. Finally, test the panel to make sure it is working properly. What should I do if my solar panel is damaged?

If you suspect a panel is damaged, your first step should be to disconnect it from the system and turn off the electricity supply to that part of your solar setup. Then, carefully assess the damage. If you see exposed wires, shattered glass, or other significant issues, do not attempt to repair it yourself.

Can a broken solar panel be repaired?

It's not advisable to repair a broken solar panel on your own, especially if it involves exposed wires or significant damage. Handling electricity and broken glass requires expertise. Contact a professional solar technician for repairs. Q. Do insurance policies cover damage to solar panels?

.

How do I know if my solar panel is damaged?

Damage can manifest in various forms. Some can be easily recognised through visual inspections, while others can be more subtle and may require you to call an expert to inspect the broken solar panel. Common types of damage include: Broken or Cracked Glass – Cracked or shattered glass is one of the most obvious signs of damage.

What should I do if my solar meter is faulty?

Contact your solar panel installer or a solar panel maintenance professional. If your generation meter is replaced, make sure you get a letter from the installer stating what they have done and that they changed the meter because it was faulty. The paperwork should also state the model and serial

numbers of the old and new meters.

What should I do if my solar panels don't work?

Checking for shade on your panels - trees and shrubs that grow and block the sun from your panels will affect the amount of electricity they produce. So it's good practice to prune them back. Keeping an eye out for birds or squirrels nesting under your panels. They can cause damage, as well as soiling your panels.

What causes a broken solar panel?

The most common cause of a broken solar panel is cracked glass. If the glass on your solar panel is cracked, you will need to replace it. You can purchase a replacement solar panel online or at a local hardware store. Once you have replaced the broken solar panel, you can now proceed to the next step.
