

Whole home inverter

Overview

What is a hybrid solar inverter?

The Sol-Ark® Whole Home hybrid inverter is the most powerful and versatile home energy storage solution on the market today. The 15K-2P hybrid solar inverter is a complete whole home backup. It can also power and charge your electric vehicles or generators and help reduce your monthly electricity bills.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2024. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

Why should you choose SolarEdge home inverters for residential use?

Our optimized home inverters solution offers greater design flexibility for small-scale residential projects. Need help?

Access our support tools & resources Maximize energy efficiency and savings with SolarEdge Home Inverters for residential use. Optimize your home's energy performance with ease.

How do I choose the best solar inverter for my home?

Reading through user reviews on app stores can give you a decent understanding of what you'll be experiencing when using a specific solar app. The "best" solar inverter for your home depends less on the inverter manufacturer and more on what your home's specific energy needs are.

What is a SolarEdge Energy Hub inverter?

In 2020, SolarEdge launched its newest and most versatile home inverter: the SolarEdge Energy Hub Inverter. The aptly named Energy Hub, later rebranded

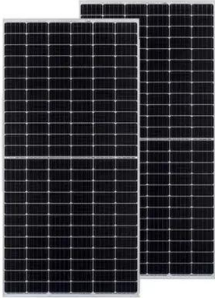

as the "Home Hub," combines the functionality of all of SolarEdge's existing inverters under one hood.

What is a solar inverter?

Solar inverters are a vital part of any solar installation, converting your solar panels' direct current (DC) electricity into the alternating current (AC) electricity usable in your home.

Whole home inverter

Powerwall

Powerwall is a home battery that provides whole-home backup and protection during an outage. Each unit is self-contained with an integrated solar inverter for added efficiency, resulting in fewer parts and faster installation. This helps make multi-unit systems
