

Wholesale domestic energy storage price list in Poland

Overview

How can Poland reduce wholesale electricity prices?

The cheapest, fastest, and future-proofed solution for Poland to decrease its wholesale electricity prices is to deploy as much wind and solar power as soon as possible. Poland's reliance on costly domestic coal means it now has the most expensive electricity in Europe.

Do Polish residents still have the power to control electricity costs?

However, Polish residents and businesses still have the power to control their electricity expenses and make informed energy decisions. This article will provide an in-depth look at the current state of electricity prices in Poland.

Do energy suppliers in Poland have dynamic pricing contracts?

By law, all large energy suppliers in Poland must offer dynamic pricing contracts as of 2024. The major incumbent electricity suppliers – typically the retail arms of Poland's big energy groups – have introduced dynamic tariff products for both residential and business customers.

Why are energy prices so high in Poland?

There are multiple reasons behind these surging prices, including investments in energy infrastructure, shifts in energy market prices, and government regulations. However, Polish residents and businesses still have the power to control their electricity expenses and make informed energy decisions.

How much electricity does Poland import in 2024?

In 2024, Poland's net electricity imports were around 2–3 TWh (roughly 1–2% of demand) as domestic generation (166.99 TWh) was slightly below consumption (168.96 TWh). The country is interconnected with Germany, Sweden, Czechia, Slovakia, Lithuania and others, allowing cross-border trading on the European market.
