

# **Why can't we install photovoltaic panels on the roof**

## Overview

---

If the panels are installed on your roof, the engineer must leave enough space under and to the sides of the system to allow heat to escape. Can you install solar panels on your roof?

Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today. Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system.

Will homeowners be able to install rooftop solar panels more easily?

Homeowners will be able to install rooftop solar panels more easily without costly planning delays. This was published under the 2022 to 2024 Sunak Conservative government. Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today.

Do solar panels need a slanted roof?

You have to position solar panels properly to achieve the highest energy production. The optimal orientation and angle usually require a slanted roof that faces the sun. Some roofs have a unique shape that might not accommodate rigid, flat panels. For those homes, flexible solar panels can be a good workaround.

Should I install photovoltaic panels on my roof?

Solar power has continued to grow in popularity and drop in cost, meaning many of us are weighing up the pros and cons of installing photovoltaic (PV) panels on our roofs. The truth is, the answer to this question comes entirely down to your unique requirements.

Do solar panels generate electricity on a south-facing roof?

Solar panels generate most electricity when they're on a south-facing roof that's sloped at 41°, and isn't shaded. It's one of the first things our surveyors

look at when checking your home's right for solar. A good surveyor can talk you through how the panels' position on your roof will affect their performance.

Are solar panels a legal requirement for new homes?

Even though installing solar panels on new builds is a great way to set new homes up with renewable energy from day one, it's not yet a legal requirement. One common problem is that developers don't use all the available roof space, resulting in a less effective solar panel system.
