

Why install photovoltaic panels even if it costs money

Overview

Are solar panels worth it?

The pros of solar panels are immense, and if you can afford the upfront cost they are absolutely worth getting. With solar panels, the average three-bedroom home will save £454 a year on their energy bills. And if you're exporting excess electricity to the grid via the SEG, you'll make an additional £160 per year.

Do solar panels increase your home's value?

Multiple studies have shown that solar panels increase your home's value, rather than devaluing it. The most recent UK study revealed that buyers will pay an extra 14%, on average, if a property comes with solar panels. For the average household, this will mean a price rise of more than £40,000.

Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.
