

# Wind Lake Power Plant

LIQUID/AIR COOLING

ON GRID/HYBRID

PROTECTION IP54/IP55

BATTERY /6000 CYCLES

## Overview

---

LTWP will be the largest single private investment in Kenya at the time it is made. LTWP claims the wind farm will reduce and possibly eliminate Kenya's dependency on diesel and heavy fuel power stations, however, this claim is unsubstantiated. Fuel imports to power thermal power stations cost the Kenyan taxpayer KSh17 billion (US\$150 million) annually. It is anticipated that the project will contribute KSh3 billion (US\$35 million) annually in tax revenue and KSh58.6 billi.

Where is Lake Turkana wind power project located?

Lake Turkana Wind Power Project (LTWP) is a wind farm in Kenya. It is located in Loiyangalani District, in Marsabit County, approximately 545 kilometres (339 mi) by road north of Nairobi, Kenya's capital city. The wind farm covers 160 square kilometres (40,000 acres) and has a capacity of 310 MW, enough to supply one million homes.

What is the LTWP wind farm project?

The LTWP wind farm project is cited as the next least cost Project to be developed. According to the LCPDP, the wind farm will generate the lowest cost power available to Kenya, which is 60% less expensive than the emergency thermal power plants.

Who is the proponent of Lake Turkana wind farm?

The Project proponent is the Lake Turkana Wind Power Consortium (LTWP), comprising of Sponsors Aldwych International, Industrial Development Corporation, IFU, KP&P Africa B.V, Norfund and Wind Power Invest A.S. LTWP is responsible for the financing, construction and operation of the wind farm.

Who owns Lake Turkana wind power?

Lake Turkana Wind Power is the largest windfarm of its kind on the African continent. Norfund has been a patient and long-term investor since the project was initiated in 2011. The windfarm was connected to the national grid in 2018. In July 2021, Norfund sold all its shares to the Anergi Group.

What is Kenya's biggest wind power project?

Construction on the \$680m wind power project, which represents Kenya's biggest private investment, was started in October 2014. The wind farm was connected to Kenya's national grid in September 2018, while official inauguration took place in July 2019. The Lake Turkana wind farm accounts for approximately 17% of Kenya's total installed capacity.

What are the benefits of Lake Turkana wind power project?

The implementation of the Lake Turkana Wind Power Project will lead to a variety of socio-economic benefits at a national level, these include: Power: Once in operation, the 300MW plant will provide low cost power (as per LCPDP). It represents a diversification of power source thus contributing to stabilising the electricity sector.
