

Wind power generation loss insurance

Overview

How do I get wind power insurance?

Contact your nearest branch. Wind Power insurance cover for commercial operators of onshore wind power installations, both during construction and whilst operational.

Why do insurers need offshore wind insurance in Asia?

Given the broad challenges for offshore wind in Asia, there is a need and hence an opportunity for insurers to offer coverage in three main areas:
Natural catastrophes: The region faces frequent and severe tsunamis and typhoons, a key risk leading to property damage and suspension of business operations.

Why did a £20 million wind turbine collapse in 2022?

In 2022, high winds caused a £20 million wind turbine to collapse, damaging its blades 1. Wind turbines are of course designed to operate in winds, however extreme wind speeds that are higher than the maximum operating limit of the turbines result in turbines being shut down and this causes disruption to operations.

Will reinsurance provide capacity for wind farms?

In the longer term, we would expect the traditional reinsurance market to provide capacity for these wind farms. The biggest challenge remains to be addressing the potential for natural catastrophe. As the technology of turbines evolves, they are expected to be more resilient regarding wind exposure. However, this is largely untested.

Does reinsurance cover Offshore wind generation in Asia?

Offshore wind generation has existed in Europe for 20 years, and government subsidies helped provide a buffer for project development. However, the relative newness and rapid growth in Asia presents certain challenges.

Appetite for providing reinsurance coverage has been limited, and addressing these issues is key to supporting new development.

Why do we need Reinsurance for offshore wind power?

From a (re)insurance perspective, increasing exposure to risk among stakeholders means coverage needs to grow in parallel with the offshore wind power industry, ultimately supporting its long-term expansion and viability, and impact on ESG advancement. What Are the Potential Risks and Challenges?

Wind power generation loss insurance

[Protection against Wind Resource Volatility](#)

Wind Resource Volatility Insurance - Protection against adverse wind conditions 3 Weather affects the power output of the main renewable energy sectors: wind, solar and hydro. Too ...

Power Generation & Utilities Business Insurance , The Hartford

Hired auto physical damage - automatically covers physical damage to any auto a renewable energy company rents, loans or leases (up to \$100,000 per loss) if the business purchases ...

The Offshore Wind Industry: The Role of Insurance

Given the widespread exposure to the offshore wind industry, insurance clubs have established expert teams to provide loss prevention advice, especially for highly specialized vessels. This support also extends to critical ...

Insurance for Wind Farms

As trusted insurance brokers for the wind power sector, we can source comprehensive coverage for offshore and inshore wind farms or your next wind turbine project. We will work closely with ...
