

Wind power generation wall painting

Overview

What is a wind turbine kinetic wall?

designed by: joe doucet type: wind power kinetic wall status: prototype the wind turbine hall by joe doucet is a kinetic wall made up of an array of rotary blades that spin individually, driving a mini generator that creates electricity.

What is a wind turbine wall?

As a modular and scaleable solution created specifically for urban and suburban built environments, the wind turbine wall can augment or exist alongside other forms of power generation. The electricity is utilized in the home or business, can be stored, or can even be fed back into the grid.

Can a wind turbine wall be used to power a home?

An array of wind turbine walls, however, might just do the trick. Doucet has built a prototype for a single spinning rod and run simulations based on that. The average annual electricity consumption for an American home uses a little over 10,000 kilowatt-hours per year.

Can Rotary Wind turbines make a home more beautiful?

NYC-based designer Joe Doucet doesn't see why renewable energy generation shouldn't actively make a home more beautiful, so he's putting together a series of "kinetic walls" using rotary wind turbines to achieve some hypnotic visual effects.

Are Doucet's wind turbine walls a good idea?

Basically, Doucet's wind turbine walls look pretty neat, but we'd be surprised if they made a useful amount of power or sold cheaply enough to pay for themselves quicker than a solar array. They're probably best viewed as a kinetic sculpture, with any energy output being a bonus.

How does Joe Doucet create a wind turbine hall?

Joe Doucet has created a Wind Turbine Hall using blades hooked up to a generator. Watch the designer's creation, which looks like a kinetic sculpture, in action. All images via Joe Doucet. Portable Wind Turbines Supply Clean Energy for People on the Move Empire State Building Offsets Its Energy Use in an Ambitious Wind Power Deal

Wind power generation wall painting

Wind Turbine Wall help power our homes by Joe ...

The wind turbine wall is made of a grid of square panes that spin at the same time along 25 axes. Currently, it is made of 25 wind turbine generators attached to vertical rods with square panels attached to them. ...
