

Wind turbine generator set price

Overview

If you have a high roof that gets enough wind speed on a regular basis then you may well consider installing a roof mounted wind turbine. They vary in power from about 0.5 kW to 2.5 kW and can be used to supplement your electricity supply. Before you take the option of getting a roof mounted turbine you need to.

For those that are serious about using wind as a means of providing renewable energy for a local source and perhaps benefitting from the Feed in Tariff, free-standing wind turbines.

Finding the initial outlay for your wind turbine development can often be a problem. There are a number of financial institutions and grants available that you can now take advantage of if you are serious about using wind.

If you are a business you may have to pay a levy or tax on the energy such as gas, electricity or coal that you is used in the day to day running of your.

One of the attractive things about installing a renewable energy source is the chance it gives you to sell your excess electricity to the power companies and make a decent return on investment. The Feed in Tariff for wind turbines.
