What is a solar panel inspection?

The solar inspection process is one of the most time-consuming parts of any company's operations, from design to installation. PV Education 101: A Guide for Solar Installation Professionals shows how to frame solar panel inspection when speaking to your customers about development costs and installation timelines.

How often should a solar PV system be inspected?

In this respect, there are some key solar PV system features that rely on adequate and appropriate electrical testing and inspection being undertaken on a regular basis. IEC 62446 recommends that periodic verification of an existing installation shall be performed.

What is inspection & testing of solar PV installations?

Inspection and testing of solar installations: 10. Ensuring the safe and efficient operation of solar PV installations is crucial under both normal and fault conditions. It is imperative to consider this aspect during the system design stage to achieve optimal energy outputs and maintain safety standards.

Are regular solar panel inspections a good idea?

Regular, scheduled inspections can sometimes be more cost-effective in the long run compared to emergency inspections. Basic visual inspections are cheaper than advanced methods involving drones or thermal imaging. Regular solar panel inspection is essential for maintaining the efficiency, safety, and longevity of your solar energy system.

Should a solar inspection be done on a sunny day?

As with any mapping mission, it's best to carry out your inspection on a sunny day. Even more so when dealing with solar panels: the sun's heat will accentuate the difference between defective (such as hotspots in solar panels)

and working components, which makes life easier for inspection crews.

What happens during an onsite solar inspection?

During an onsite solar inspection, systems are evaluated for installation quality, equipment compatibility and compliance to building codes, and ensuring the system was installed as it was permitted. In some parts of the country, a licensed electrician is required to be present during an electrical inspection.
