### [United States: Energy Country Profile](#)

United States: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

### List of countries by renewable electricity production

226 ?· This is a list of countries and dependencies by electricity generation from renewable sources each year. Renewables accounted for 28% of electric generation in 2021, consisting of hydro (55%), wind (23%), biomass (13%), solar (7%) and geothermal (1%). China produced ...

### Renewable energy , UNEP

Renewables on the rise For the 760 million people in the world who lack access to electricity, the introduction of modern clean energy solutions can enable vital services such as improved healthcare, better education, and internet access, thus creating new jobs, improving livelihoods, and reducing poverty. Driven by the global energy crisis and policy momentum, renewable ...

### Renewable energy - powering a safer future , United Nations

Renewable energy actually is the cheapest power option in most parts of the world today.

Prices for renewable energy technologies are dropping rapidly. The cost of electricity from solar power

### **IRENA - International Renewable Energy Agency**

Tripling renewable energy capacity by 2030 is both an environmental necessity and a pathway to a more equitable, prosperous, and resilient world, with benefits in sustainable development, economic growth, social equity, and health. In the small community of

### [Renewable energy statistics 2023](#)

The International Renewable Energy Agency (IRENA) produces comprehensive, reliable datasets on renewable energy capacity and use worldwide. Renewable energy statistics 2023 provides datasets on power-generation capacity for 2013-2022, actual power generation for 2013-2021 and renewable energy balances for over 150 countries and areas for 2020-2021.

### **Massive global growth of renewables to 2030 is set to match ...**

The Renewables 2024 report, the IEA's flagship annual publication on the sector, finds that the world is set to add more than 5 500 gigawatts (GW) of new renewable energy capacity between 2024 and 2030 - almost three times the increase seen between 2017

### [Renewables 2022 Global Status Report](#)

Countries with higher shares of renewables in their total energy consumption enjoy a greater level of energy independence and security. In response to an unprecedented public health crisis, ...

### Share of electricity production from renewables

Ember (2024); Energy Institute - Statistical Review of World Energy (2024) - with major processing by Our World in Data. "Share of electricity generated by renewables - Ember and Energy Institute" [dataset]. Ember, "Yearly Electricity Data"; Energy Institute

### [Renewable energy statistics 2020](#)

The International Renewable Energy Agency (IRENA) produces comprehensive, reliable data sets on renewable energy capacity and use worldwide. Renewable Energy Statistics 2020 provides data sets on power ...

### [Top 10: Renewable Energy Companies](#)

In celebration of those paving the way to a more sustainable future, we shine a light on the world's leaders in renewable energy. 10. Algonquin Power & Utilities Revenue: US\$3.3 billion Renewable energy capacity: 4GW

## Executive summary - Renewables 2023 - Analysis

The world is on course to add more renewable capacity in the next five years than has been installed since the first commercial renewable energy power plant was built more than 100 years ago. In the main case forecast in this report, almost 3 700 GW of new renewable capacity comes online over the 2023-2028 period, driven by supportive policies in more than 130 countries.

## Executive summary - Renewables 2024 - Analysis

Global renewables growth set to outpace current government goals for 2030. Global renewable capacity is expected to grow by 2.7 times by 2030, surpassing countries' current ambitions by ...

## 10 Biggest Renewable Energy Companies in the World

Once a niche segment, renewable energy is rapidly becoming an important source of power around the world. The largest renewable energy companies are headquartered in Spain and Denmark, but others

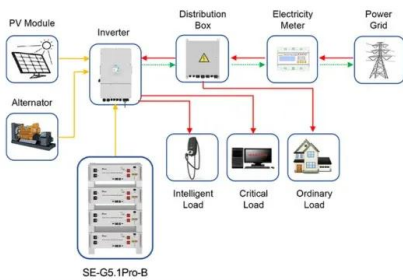

## Top 10: Nuclear Energy-Producing Countries , Energy Magazine

Although not renewable, nuclear energy is still recyclable and produces zero greenhouse gases, serving as the second-largest source of low-carbon energy in the world behind hydropower. Here are the world's top 10 nuclear energy-producing countries.

### 5 smart renewable energy innovations

In its 2023 report, Fostering Effective Energy Transition, the World Economic Forum says that 95% of countries have improved their total Energy Transition Index score over the past decade, but there has been only "marginal growth" in the past three years.

Application scenarios of energy storage battery products

### **Top 10: Countries Leading the Energy Transition**

In a bid to confront the urgent challenges presented by climate change, the energy transition -- the shifting from fossil fuels to renewable sources -- has become a critical priority for many countries around the world. As a result, a whole host of countries are increasingly investing in clean energy technologies, striving to meet net-zero emissions goals and ...

### **Electricity Mix**

Nearly all these countries have one thing in common: they get a lot of electricity from hydropower and/or nuclear energy. Solar, wind, and other renewable technologies are growing quickly. They will hopefully account for a large share ...

### **Renewables - Global Energy Review 2021 - Analysis**

China alone should account for almost half of the global increase in renewable electricity in 2021, followed by the United States, the European Union and India. Renewable electricity generation ...

[Top 100 companies: Renewable Energy](#)

Top 100 companies: Renewable Energy - Get the report with graphs and tables on statista ! Statista+ offers additional, data-driven services, tailored to your specific needs. As your partner for

[Renewables 2022 Global Status Report , UNEP](#)

As the world's only crowd-sourced report on renewable energy, the Renewables 2022 Global Status Report (GSR) is in a class of its own. The Renewables 2022 Global Status Report documents the progress made in the renewable energy sector. It highlights the opportunities afforded by a renewable-based economy and society, including the ability to achieve more ...

**Renewable power on course to shatter more records as countries ...**

The growth is set to continue next year with the world's total renewable electricity capacity rising to 4 500 gigawatts (GW), equal to the total power output of China and the United States combined, says the IEA's new Renewable Energy Market Update

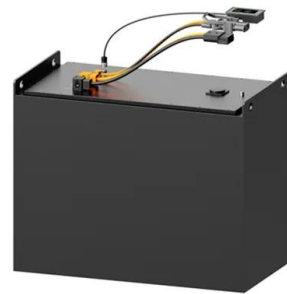

### [Top 10: Biggest Renewable Energy Companies](#)

2. Iberdrola SA Market cap: \$72.67 Iberdrola SA is a Spanish multinational electric utility company that is headquartered in Bilbao, Spain. The company is one of the largest utilities in the world and operates in over 40 countries, primarily in Europe, the Americas, and

### How Electricity Is Changing, Country by Country

Coal continues to dominate electricity generation in other rapidly-developing countries, many of them in Asia, as well. India, the world's most populous nation, has set strong renewable energy

### Renewable Energy

Renewable energy statistics 2024 provides datasets on power-generation capacity for 2014-2023, actual power generation for 2014-2022 and renewable energy balances for over 150 countries and areas for 2021-2022.

### Energy Mix

Globally, our progress in shifting towards a low-carbon economy has been slow. That may leave us pessimistic about a path forward. But some countries - often some of the world's richest countries who have high carbon footprints - show ...

### Fourteen countries in the world get almost all of their electricity

Since 2020, 14 countries have consistently generated over 95% renewable electricity, according to Ember's Yearly electricity data. In eight of these countries, electricity has been almost entirely renewable-based for over 20 years.

### [Electricity - Renewables 2023 - Analysis](#)

While renewables are currently the largest energy source for electricity generation in 57 countries, mostly thanks to hydropower, these countries represent just 14% of global power demand. By ...

### Global renewable energy consumption by country 2023 , Statista

In 2023, renewable energy consumption in China reached 27.6 exajoules, more than any other country in the world. Premium Statistic Historical renewable energy consumption APAC 1980-2023

### Renewable energy production by country 2020 , Statista

China was the largest producer of renewable energy in the world. In 2020, the country produced nearly 861.3 billion kilowatt hours of renewable energy. The United States and Germany followed as

## Renewables

The world is on course to add more renewable capacity in the next five years than has been installed since the first commercial renewable energy power plant was built more than 100 years ago. Almost 3 700 GW of new renewable capacity will come online over the 2023-2028 period, driven by supportive policies in more than 130 countries.
