Worldpower energy

Wind and solar cover 12% of world electricity supply in 2022

Around 12% of global electricity supplies came from wind and solar power in 2022. And they accounted for 80% of the world's increased need for electricity. The world saw a 2.5 percent increase in demand on average for electricity in 2022. However, demand differs

Electricity generation

Ember - Yearly Electricity Data (2024). The data is collected from multi-country datasets (EIA, Eurostat, Energy Institute, UN) as well as national sources (e.g China data from the National Bureau of Statistics). Energy Institute - Statistical Review of World Energy

Our vision

WorldPower Energy - by natureThe future of clean and sustainable energy production
WorldPower Energy is the result of one man's passion for smart inventions and a vision to solve the existing problem of utilizing the ocean, its calm watersand enormous resources in buoyancy and gravity. Aiming to secure the planet clean, renewable energy and a sustainable [...]

How Power-to-X could be key in the global energy transition

Renewable energy from wind turbines and solar is key to decarbonizing everything we can electrify directly - but electrification is not a feasible solution for all the energy-intensive

industries. We need other energy sources to decarbonize sectors such as aviation or shipping, and this is where Power-to-X comes in, it bridges the gap between a wind turbine ...

Electricity Mix

Electricity is one of three components that make up total energy production. The other two are transport and heating. As we see in more detail in this article, the breakdown of sources -- coal, oil, gas, nuclear, and renewables -- is different ...

[Electricity production by source](#)

Which countries get the most electricity from low-carbon sources? Why did renewables become so cheap so fast? Charts. Absolute annual change in primary energy consumption. Access to clean fuels for cooking vs. per capita energy ...

Nuclear Energy

Nuclear energy generation by country The global trend in nuclear energy generation masks the large differences in its role at the country level. Some countries get no energy from nuclear -- or aim to eliminate it completely -- ...

Massive global growth of renewables to 2030 is set to match ...

The Renewables 2024 report, the IEA's flagship annual publication on the sector, finds that the world is set to add more than 5 500 gigawatts (GW) of new renewable ...

The WPE Team

WorldPower Energy consists of a small but solid team consisting of people with different backgrounds, experience and interdisciplinary expertise. BENDIK BØ Inventor, Founder & CVO GAGI PESKOVIC Technical Leader, Mathematician & Physicist JOSTEIN SVERDRUP BØ Hydraulic Supervisor ASBJØRN BØ Electrical Manager Job vacancies There are currently no ...

Renewable Energy

Since the Industrial Revolution, the energy mix of most countries across the world has become dominated by fossil fuels. This has major implications for the global climate, as well as for human health. Three-quarters of global greenhouse gas emissions result from the ...

De fick miljoner i stöd för att utveckla "evighetsmaskin"

Norska företaget Worldpower Energy har fått ekonomiskt stöd från Innovasjon Norge och bidragssystemet Skattefunn för att utveckla en maskin som ska producera mer energi än den du tillför. "Fullständigt bortkastat", menar fysiker.

The solution

WorldPower Energy - by natureThe future of clean and sustainable energy production The ocean covers 70% of the planet's surface and is an almost unlimited source of energy that today is barely utilized. World Power Energy has found a unique solution that creates large surpluses of energy by utilizing the interaction between gravity and buoyancy [...]

[Energy Production and Consumption](#)

This article focuses on the quantity of energy we consume -- looking at total energy and electricity consumption; how countries compare when we look at this per person; and how ...

[World Energy Outlook 2022 - Analysis](#)

World Energy Outlook 2022 - Analysis and key findings. A report by the International Energy Agency. With the world in the midst of the first global energy crisis - triggered by Russia's invasion of Ukraine - the World Energy Outlook 2022 (WEO) provides indispensable analysis and insights on the implications of this profound and ongoing shock to energy systems across the ...

Key World Energy Statistics 2020 - Analysis

IEA Key World Energy Statistics (KWES) is an introduction to energy statistics, providing top-level numbers across the energy mix, from supply and demand, to prices and research budgets, including outlooks, energy indicators and definitions. KWES is part of the

Access to Energy

How many people don't have access to electricity? Global access to electricity has been steadily rising in recent decades. This progress also holds when we look at the total number of people without electricity access. In 2015, the total number without electricity fell below one billion for the first time in decades, very likely the first time in our history of electricity production. 3

Executive summary - World Energy Outlook 2023 - Analysis

World Energy Outlook 2023 - Analysis and key findings. A report by the International Energy Agency. Policies supporting clean energy are delivering as the projected pace of change picks up in key markets around the world. Thanks largely to the Inflation Reduction

Buy Custom Ebike Lithium Battery Manufacturer from Shenzhen Worldpower

Buy low price Custom Ebike Lithium Battery Manufacturer by Shenzhen Worldpower Energy Storage Technology Co.,Ltd, a leading supplier from China. 902 similar products are also available from global exporters.

30% of the world's electricity came from renewable ...

Renewable electricity production is growing quickly, mostly thanks to the deployment of solar and wind. Ember has just published its latest Global Electricity Review, which includes final updates on electricity generation ...

Solar energy , Definition, Uses, Advantages, & Facts , Britannica

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is vastly in excess of the world's energy requirements and could satisfy all future energy needs if suitably harnessed.

[Hydraulisk løsning for kraftoverføring](#)

Hos WorldPower Energy jobbes det bestandig med flere parallelle og overlappende prosesser. På teknisk avdeling er det for tiden høy ingeniørfaglig aktivitet, med fokus på design og konstruksjon. Det jobbes særlig med optimalisering og bygging av det hydrauliske systemet for kraftoverføring.
