

# **Xiamen solar power generation**

## Overview

---

How much solar energy does Xiamen produce?

With the installation of 100,000m<sup>2</sup> of rooftop solar panels, the manufacturing hub in Xiamen, which has state-of-the-art production lines for low and medium voltage switchgear and circuit breakers, now generates enough solar energy to cover around 50 percent of the site's annual electricity energy consumption.

How much energy does a rooftop PV system generate in Xiamen?

The results show that in Xiamen City (Fig. 7), a 1 kW rooftop PV system generates 3,873 kWh annually. Based on the PVWatts model, a 4 kW PV system covers approximately 28 m<sup>2</sup>, and the usable rooftop area in Xiamen is estimated to accommodate about 1,915,279 units, generating approximately 7,427 GWh annually.

Should Xiamen extend photovoltaic technology to low-cost capacity?

As a city with advanced photovoltaic technology, Xiamen should extend PPG technology to low-cost capacity to a greater extent in the electricity market. Besides, in the clean energy base led by Fujian Province, the complementary advantages of WPG and PPG should be enhanced to improve the power generation system.

How much electricity does Xiamen use a year?

In terms of energy production, it is estimated that in 2022, Xiamen's total social electricity consumption was 33.579 billion kWh, while the annual electricity generation of PV-GR could meet 22.13 % of the city's electricity demand.

How much power will Xiamen generate in 2025?

According to the plan issued by the National Energy Administration, WPG and PPG would account for about 16.5% of the total power generation in 2025,

adhering to the centralized and distributed simultaneously. For Xiamen, several barriers hinder the effective utilization and development of renewable energy.

Does Xiamen have a PV-GR system?

Using Xiamen City as a case study, research shows that Xiamen has about 54 km<sup>2</sup> of rooftops suitable for PV-GR. Annually, PV-GR can produce about  $5.931 \times 10^3$  tons of biomass and generate 7,427 GWh of electricity, meeting about 22.13 % of Xiamen's annual electricity demand.

## Xiamen solar power generation

---

### Professional focus on photovoltaic power generation

Professional focus on photovoltaic power generation. Committed to integrated solutions for solar photovoltaic design, development, investment, construction, and maintenance. Visit our products.

### Xiamen Plus Solar Energy Technology Co.,Ltd. , LinkedIn

Xiamen Plus Solar Energy Technology Co.,Ltd. Solar Electric Power Generation a high-tech enterprise specializing in the field of solar photovoltaic products, integrated R& D, manufacture, ...
