

Zambia solar power target price

Overview

What is Zambia's first large-scale solar plant?

On March 11, 2019, the Zambian president inaugurated the first solar plant financed and tendered under the Scaling Solar program. The plant, which is fully operational now, will provide 54 megawatts of solar power, making it the country's first large-scale solar plant. The Bangweulu project was awarded to NEOEN S.A.

Can solar power save money in Zambia?

With its year-round sunshine and geographical location, Zambia is well positioned to integrate solar power into its energy mix dominated by climate-vulnerable hydropower. "The Scaling Solar Project will make Zambia save significant amounts of money in the long run," said Ina Ruthenberg, World Bank Country Manager for Zambia.

Who owns 50 MW of solar power in Zambia?

In 2022, the Southern, Western, and Luapula provinces of Zambia's Zambia Electricity Supply Corp. (ZESCO) have issued a call for tender for the development and construction of 50 MW of PV facilities, 90% of the infrastructure will be owned by the selected developer, and the other 10% will be held by the state-owned utility, ZESCO.

What is the potential for solar power generation in Zambia?

The potential for solar power generation in Zambia is enormous due to the amount of sunlight. The government and participants in the corporate sector have taken action to take advantage of this opportunity and tap into this renewable resource. There is a lot of potential despite the nation's existing solar capacities, which are close to 100 MW.

Why is Zambia embracing solar energy?

Zambia is one of the nation's leading the charge in embracing solar energy.

Zambia's solar energy industry has undergone a tremendous transition in 2023, opening the way for a future that is cleaner, greener, and more robust. The potential for solar power generation in Zambia is enormous due to the amount of sunlight.

Will Zambia deploy 500 MW of solar PV by 2023?

The Zambian government aims to deploy 500 MW of solar PV by 2023, in order to ease chronic power shortages. The sub-Saharan country currently relies on 2.8 GW of installed power, with about 85% coming from hydropower. Its access to electricity is about 30%.
